# Aviation's Premier Interior Plating Specialist

## Signature Plating has over 100 years of experience building relationships and exceeding customer's expectations in the Aviation Industry.

Having owned and operated both a Full Service Interior Refurbishment Facility and a Safety Restraint business before the start of Signature Plating, we bring a unique understanding to our customers' needs and desires never seen before in the Decorative Plating Industry.

We provide over 100 finish options, sure to meet the desires of any and all customers, plus match any custom or industry finish.

We will guide you through the process and help plan and organize to meet the strictest of turn times.

Signature Plating can supply you with custom reports that can be supplied Daily, Weekly, or Monthly. This information can supplement your planning efforts and can confirm our on-time deliveries to support your project. In addition to comprehensive reports, we have introduced to the industry SignaTrack which allows you to track your orders in "real time" from your PC or smart phone. SignaTrack provides you with an immediate and accurate status of your open orders.

Because of our extensive experience operating in the Aviation Safety Restraint area (25 yrs.) we are the only Decorative Plater who is certified to Disassemble and Reassemble your re-web restraints saving you valuable time (up to 4 days) on your turn around time.

Built as a "One Stop-Shop" experience, Signature Plating is proud to offer a Full Service Anodize Department.

No matter the size of your project Signature Plating is the right choice:

- **Manufacturers**
- **Completion Centers**
- **Interior Designers**
- **Flight Departments**

Put us to work for you. Simply contact **Zane Leake** at 1-210-658-5599 (Office) or 1-210-238-9541 (Mobile) and let us know how we can help!

# Protect your Investment

## Do's and Don'ts of caring for your Decorative Plating

plating continues to show its brilliance and luster.

### Do

- **Wear latex (powder free) gloves when handling parts**
- **Wipe parts clean of any liquids that come in contact using a soft Non-abrasive cloth (especially true of highly acidic liquids such as alcohol, orange or tomato juice.)**
- **A non-abrasive wax can be applied periodically which helps to protect the plating.**
- **Use caution when installing or cleaning parts to not damage the part as this is decorative and not industrial plating.**

### Don't

- **Do not use harsh cleaning agents or any with ammonia content**
- **Do not allow liquids to settle on parts**
- **\*Do not break the clear coat seal as moisture will attack the plating.**

*\*Many finishes require a clear-coat protectant in order to stop tarnishing or oxidation.*

### **Signature Plating announces Durable Custom Color Anodize Finishes**

With an industry focused on branding and image, there are a multitude of on-going programs at any single time where the interiors are being updated and upgraded. There are functional, cosmetic, and weight goals with each of these programs.

Signature Plating has been developing new technologies and processes to support the cosmetic appearance of the finishes that are being sought after by design firms, airlines and aircraft owners. All metal finishes are not alike and Signature Plating is making its mark within these markets to deliver the needed finishes to meet the intended design vision.

It is a fact that an airline passenger environment is one that can quickly show a deficiency in product design, materials and finishes. Product and design elements need to be able to withstand these highly cycled environments to meet the customer's intended goals, to be a value to the operator and to perform as designed for the customer.

Signature Plating has been developing and investing in its **durable anodize performance finishes**. Our recent support of airline cosmetic finishes has driven us to invest in our Anodize finish product line. Signature Plating has been delivering custom anodize finishes that are being sought after for aircraft interiors. These anodize finishes are highly durable and will stand up to the harsh environment of an aircraft's interior. In addition to a selection of existing standard finishes, Signature Plating is also able to develop custom colors with our durable anodize finishes. Anodizing can be now used as a primary finish in the design of specific interior color schemes. The available colors that can be developed is limitless and gives industrial designers, airlines, and MRO facilities the flexibility to introduce the exact color/ finish to realize the design vision. This is extremely important when there are designs that require specific and complementing metal finishes.

**FOR IMMEDIATE RELEASE**

### **Signature Plating Announces Antimicrobial Clearcoat Protection**

---

**CIBOLO, TEXAS – August, 24 2020 –** [Signature Plating](#) now offers its durable clearcoat with an “antimicrobial” additive to not only protect its decorative finishes but those who will be handling these finished parts including installers and passengers. With the growing demand for solutions to address the spread of bacteria in cabin environments, the Signature Plating Antimicrobial clearcoat will be applied directly to the metal parts surfaces. Signature Plating collaborated with one of its coating supplier partners to develop an antimicrobial solution that could be added to its clearcoat.

The emerging trend for airlines, completion centers, MRO’s, and OEM suppliers are to provide interior products that have a germ/microbe inhibitor imbedded in the specific materials to build confidence with the flying public and to offer a safe cabin environment. As long as this clearcoat is on the part, it will provide the antimicrobial barrier. The antimicrobial inhibitor is suspended in the clearcoat and covers the whole part and is spread throughout the thickness of the clearcoat.

The Signature Plating Antimicrobial Clearcoat has been tested, passed and certified to ISO 22196:2011 to reduce the microbes on the parts surface. The antimicrobial will not allow the microbes to live on the parts surface preventing the spread of bacteria.

Signature Plating is now using this Antimicrobial Clearcoat on all of its parts requiring a clearcoat finish.

## **FOR IMMEDIATE RELEASE**

### **Signature Plating Announces Plating Plastics Division**

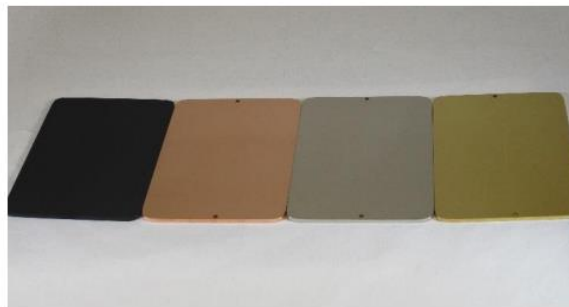

---

**CIBOLO, TEXAS – October 16, 2018 –** [Signature Plating](http://signatureplating.com) is pleased and proud to announce that they now have the capability to plate plastics in house. With the growing demand to reduce aircraft weight for cabin components, Signature Plating now has the ability to support the growing need to provide aircraft interior suppliers and designers with the option to design and install lighter aircraft components requiring decorative plating.

It was the collaborative effort of several specialty companies over many months to install this 19-station state of the art plastics plating line. Signature Plating is excited to introduce this service to its customers so they can provide significant weight reductions in their aircraft designs which equals significant fuel savings.

To ensure the line runs efficiently, we have a dedicated staff consisting of chemist and line operators specifically groomed to support this process. The process of plating plastic is very technical and time sensitive. Signature Plating technicians have been thoroughly trained by plastics plating experts on the best industry practices on proper equipment operation and maintaining consistency of the plated parts. Our quality process includes inspections that are done at every interval to ensure the highest level of quality and color continuity. This is followed up with a final inspection for part approval and release to the customer.

With the plastics division now on line, there is sufficient capacity to start work on programs and to produce samples for customer evaluation. We are looking for opportunities to fill our available capacity in the short term.

#### **About Signature Plating**

Signature Plating is a full-service plating facility dedicated to producing the highest quality products with rapid turn times. The company's services include decorative plating and anodizing for the aviation industry, as well as other VIP markets. If it can be plated, rest assured that Signature can do it — and do it well. **Signature Plating announces**

Signature Plating of Cibolo Texas announces a new service that extends the care of decorative plated parts for aircraft owners, completion centers, MRO facilities and OEM's

SignaVantage covers and maintains the plating finish of installed and in-service aircraft interior parts for a period of 3-5 years depending on your customized plan. Aircraft interiors are expensive and are often unique to customer design input. SignaVantage helps to extend the interiors "new look" over time with periodic re-plating of high use and or damaged plated parts. Cupholders, ashtrays, seat belts (not including rewebbing etc.), coat hooks, and sinks are the most common items that show signs of regular use. The plating is worry-free and at no cost to the customer regardless of the issue or fault (removal, shipping, re-installation, and/or replacement parts additional), This SignaVantage service is available when the entire aircraft is originally plated by Signature Plating!

As parts become worn from typical use, they can be removed and returned to Signature Plating to have the plating restored to a new finish condition. The SignaVantage program allows aircraft interiors to always look their best.

**About Signature Plating**

Signature Plating is a full-service plating facility dedicated to producing the highest quality products with rapid turn times. The company's services include decorative plating, plastic plating, parts manufacturing, and anodizing for the aviation industry, as well as other VIP markets. If it can be plated, rest assured that Signature can do it — and do it well. For more information, please call 210.658.5599 or visit [signatureplating.com](http://signatureplating.com).

## **FOR IMMEDIATE RELEASE**

CUSTOM PARTNER SOLUTIONS

### **Signature Plating ...Producing finished parts from start to finish**

---

**CIBOLO, TEXAS – August 14, 2019** Signature Plating of Cibolo Texas identified a trend for finished parts a couple years ago and has developed internal processes to support. With direct input from customers, meetings with industry leaders, they desire delivered parts be complete and ready for installation.

While the concept isn't new, today's OEM's, seat manufacturer's and integrators are looking for ways to streamline their internal processes related to materials logistics and parts processing consolidation. Signature Plating recognized the need for this type of partnership and offers support that can deliver a finished part to its Customer. The market is looking to their primary suppliers to provide a finished part that meets a programs' or Customer's specific cosmetic specification that is ready for installation once delivered.

Our Customers are sourcing every aspect of part acquisition from the identification of the potential supplier to manufacturing and then to the plating and/or anodizing. Streamlining this process significantly reduces the inventory, vendor management costs and provides an opportunity for substantial savings. Production schedules are better maintained coordinating with one reliable Vendor.

Supply Chain Managers need to reduce their internal costs, paperwork and daily management of inventory, manufacturing, and outside processes. The program management is transferred to Signature Plating and becomes our responsibility. Signature Plating is working with multiple customers developing programs that save considerable inventory maintenance and acquisition costs. The expanded supplier role gives Signature Plating total responsibility to manage inventory, manufacture, process and deliver the desired program parts virtually right to the production line.

This arrangement allows Signature to more fully support our customers by providing them greater opportunity to focus on the development of new products to meet their Company goal and objectives. Our Customers are always looking for methods to maximize their internal resources, Signature Plating listened and delivered!

# PLATE EXPECTATIONS

To keep up with growing demand, Signature Plating has expanded its production of anodized plated parts by 100%

Signature Plating has been developing new technologies and processes to support the aesthetics required of finishes by design firms, airlines and aircraft owners. "Not all metal finishes are alike and Signature Plating is making its mark within these markets to deliver the finishes needed to meet designers' intended visions," says Zane Leake, vice president of sales at the company.

In particular, Signature Plating has developed new anodized performance finishes to provide greater aesthetic choice for airlines. "Our custom anodized finishes are being sought after for aircraft interiors," says Leake. "These finishes are highly durable and will stand up to the harsh environment of an aircraft interior."

In addition to a standard range of anodized finishes, custom colours are available. "The anodized look can be now used as a primary finish, supporting specific colour schemes," says Leake.

He emphasises that an unlimited palette is available with these finishes,

enabling designers, airlines and MRO firms to introduce the exact colour/finish required to realise the design vision. "This is extremely important with designs that require specific, complementary metal finishes," adds Leake.

This new capability is offered in addition to the company's existing expertise in supporting custom decorative finishes for metal and plastics. "We have listened to our customers and are delivering decorative finishes to meet their requirements," says Leake. ✖

# SERVICE WITH A SMILE

Signature Plating has always focussed on providing the best customer service and quality. This remains its charge as the company goes through changes

**T**he end of the fourth quarter of 2017 was pivotal for Signature Plating on a number of levels.

To bolster its already strong market presence, the company made changes to its organization including new partnerships and personnel. The focus was on positioning the company as a capable international resource for decorative plating, plastic plating and anodized finishes. This was to be the beginning of a growth strategy to bring awareness to the company and its expanding capabilities.

Additionally, Signature Plating was refining its message to align with its global efforts. Signature Plating's tag line 'Custom Partner Solutions' is a reflection of its corporate values and the high regard with which its customers are viewed. "All of our customers are partners, and we support their businesses/projects on many levels," says Frank McKnight, CFO at Signature Plating. "We work with them during all phases of planning and budgeting and provide support for them from start to finish. Our customers are our partners and we treat them as such."

## CUSTOM PROJECTS

Each customer has specific needs. "We are a custom solution-based company," says Paul Sahanek, president at Signature Plating. "Our customers have high expectations put on them and it is our job to support these expectations. We will deliver on time, on budget and with the quality they require to be successful. If they succeed, then we have done our job. We are responsible for those items they entrust us with and we take that seriously, that's what partners do."

With a growing customer base, both domestically and internationally, the demand for information also grows.

ABOVE, LEFT TO RIGHT: FRANK MCKNIGHT, PAUL SAHANEK AND ZANE LEAKE

RIGHT: A PART MADE BY SIGNATURE PLATING, READY FOR PLATING

"Signature Plating is currently updating its website with additional content and a new look," says Zane Leake, vice president sales. "This will assist those who are looking at Signature Plating services to navigate its many capabilities and to provide them with the exact information they desire."

## NEW CAPABILITIES

During the past 14 months, Signature Plating has added the capability to plate ABS and fire-retardant ABS plastics, expanded its anodized colour range and manufactured metal parts with decorative finishes ready for installation.

The company is always evaluating new technologies to support surface finish trends. It says the next 12 months will prove once again that Signature Plating is motivated to provide the necessary solutions for its partners, for the short and long term. ☒

The company provides custom plating services for parts ranging from screws and washers to stairways
